EXPERIENCE

Datalogic System, S.A.

Guatemala City, Guatemala

Software Engineer

September 2024 – Present

- Migrated a legacy medical system from .NET Framework WinForms to a web application with .NET Core, Angular, and OracleDB, preserving 100% of existing features and modernizing the user experience.
- Implemented unit tests with NUnit in a hospital system, achieving full coverage of critical features.
- Designed and developed an appointment-scheduling solution with .NET, Angular, and OracleDB, integrating the Hospital Information System (HIS) with Radiology and Laboratory Information Systems (RIS), reducing patient wait times.
- Analyzed analog workflows across 4 government entities and produced digital maturity assessments, obsolescence reports, and migration roadmaps.
- Implemented a regulatory reporting pipeline for a bank on Databricks with Medallion architecture, automating the generation and periodic delivery of reports.
- Developed a real estate aggregator using web scraping techniques across multiple sources, integrating interactive maps via Google Maps API and OpenStreetMap to visualize properties and nearby services. Built with Nuxt, Vue, and PostgreSQL.

Sitecpro, S.A.

Guatemala City, Guatemala

Development Lead

August 2023 – September 2024

- Led a team of five developers using Scrum methodology to maintain and evolve software systems for fintech and retail clients.
- Led the migration of corporate code repositories from SVN to Git, successfully migrating 64% of the company's total repositories.
- Standardized version control practices with Gitflow and CI/CD pipelines via GitHub Actions, reducing deployment and testing time by 13%. Consolidated repositories using monorepos and Git submodules, reducing their count by one-third.
- Designed and developed a cross-platform mobile app (Android/iOS) for bank check scanning and collection for community financial institutions in Guatemala, built with .NET, Vue, and Capacitor, processing over 1,200 checks per hour and supporting over 100 concurrent users.

Software Developer

March 2021 – August 2023

- Designed and developed a payroll management system including vacation assignment, absence management, monthly/bi-weekly payroll calculations, contract generation, work hour tracking, employee records, and legal reporting using Odoo and Python, deployed at a university and multiple small businesses.
- Designed and developed a digital signature platform with digital certificates, one-time certificates, and digital stamps, integrating multiple identity providers via REST APIs; built with Vue 2/3, Python, Odoo, and PostgreSQL, containerized with Docker, and deployed on Kubernetes on AWS and later Oracle Cloud, for over 12 financial and government entities across Central America.
- Migrated a document management frontend from Vue 2 to Vue 3, improving the codebase by rewriting Vue components from Option API to Composition API.
- Developed modern and responsive front-end interfaces using Vue.js and Nuxt for multiple fintech and small business clients.
- Developed a banking document processing, centralization, and search system using .NET, Vue.js, and Elasticsearch, indexing 72% of the document repository and reducing staff search time by 99%.
- Developed a communication interface between Wi-Fi receipt printers and a cloud POS system using Python, SignalR, and Blazor (.NET), deployed in over 10 restaurants and cafés, eliminating the need for local servers and on-premises cabling.

PROJECTS

vue-pdf | *Vue, TypeScript, NPM, Vitest, GitHub*

2022 – Present

- Developed an open-source PDF viewer component for Vue.js on top of pdf.js. Published to NPM with 20K+ weekly downloads.
- Implemented unit tests with Vitest to ensure code quality and reliability.
- Used GitHub Actions to automate testing and deployment on each new release, documented using VitePress and deployed on GitHub Pages.
- Available at <https://github.com/TaTo30/vue-pdf>.

EDUCATION

EUDE Business School <i>MBA in Business Intelligence and Big Data</i>	Madrid, Spain <i>January 2026 – February 2027 (Expected)</i>
Universidad de San Carlos de Guatemala <i>Bachelor of Computer Science and Software Systems</i>	Guatemala City, Guatemala <i>February 2018 – July 2024</i>

TECHNICAL SKILLS

Languages: Java, Python, C#, SQL (PostgreSQL, SQL Server, Oracle), JavaScript/TypeScript, HTML/CSS
Frameworks: Vue, Angular, Node.js, .NET, Blazor, Odoo, Vitest, NUnit, Nuxt, TailwindCSS, Capacitor, SignalR
Developer Tools: Git, Docker, Kubernetes, GitHub Actions, Azure DevOps, Databricks, Elasticsearch, Google Cloud Platform, Oracle Cloud, Amazon Web Services
Libraries: PyTorch, Firebase, Supabase
AI Tools: GitHub Copilot, Claude Code
Methodologies: Agile, Scrum
